25X1 1. Leuna: Employees of the Leuna-Werke are now in the vicinity of Gorki. Until 24 December 1946, the deportees were quartered in temporary barracks built by German PWs; they are now (presumably January-February 1947) living in housing units similar to German suburban settlements. Families with three or more children are provided with three rooms; those with one or two children are entitled to two rooms; childless workers get a single room. There are no schools. The period of employment is five years, bottom and we do not believe we shall see our home again."

25X1 2. Siebel:

- ✓ a. Deported Siebel employees are located in Kimry and are working in an aircraft factory ten kilometers from that city. Turbo-fighters are being produced.
- ✓ b. Two turbo-fighters, said to be model D SE 346 completed in Halle, arrived in Russia in February 1947.
- ✓ c. Chief engineer Fuchs, engineer Fellbach, and chief pilot Mowsch and Ziese are among the Siebel personnel at Kimry. They live in a restricted compound but are permitted freedom of movement within ten miles. Travel beyond that limit requires a special permit from the local komendatura.
- ✓ d. Simov, a Soviet officer, returned from Russia to Halle about 20 April. He is looking for additional German recruits, preferably ex-Siebel employees who are chemists, statisticians, and specialists in aerodynamics.
